## SOS WATER

Through whimsy and poetry, SOS Water invites young readers to consider the fate of our planet's water and the everyday choices that make a difference.

A sailor named Lalo rescues a bright-red goldfish named Rosa and together they embark on a global journey to find a clean, safe place for her. But wherever they go – a pond, a mountain lake, the Arctic ocean, the desert river, the beach – they are confronted by a world dominated by plastic water bottles. They discover the water is choked, flooded even, with discarded single-use plastic water bottles.
